MUSCAT STUDENT ACCOMMODATION

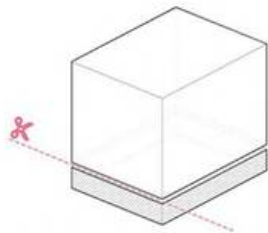

CLIENT: AQAR_ Al Khonji Real Estate.
CONSULTANT: Econtext Co.
LOCATION: Muscat, Sultanate of Oman.
FUNCTION: Resort
BUILT-UP AREA: 6300 m²
STATUS: Under Construction
DATE: 2020

Beside Amin mosque in Muscat city, on a rising land, AQAR Real Estate company is about to build up an accommodation center, in a 30*23 meters site, with maximum use of space and a compact design.

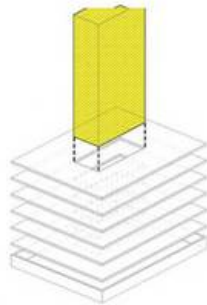

Units are organized in four rows, circling around the building, and swiffling on each other in five levels on the ground floor. Then they continue beneath the ground in three basement floors. Between the rows we access to an open spatial gap which is dedicated to a terrace for gathering people and leading them to the units, as well as it completes the formal idea of the design.

Presuming to accommodate about 150 students in about 22m² average area for each unit, with an open plan on ground floor for service and entertainment, and finally a green roof top for gatherings and social interaction, the project will suffice to fulfill the client and users' requirements along a minimal spatial design.

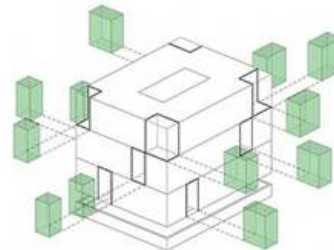

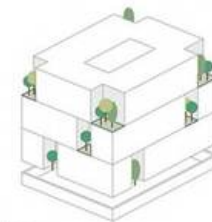

1. Separating different functions

2. Circulation and service Core

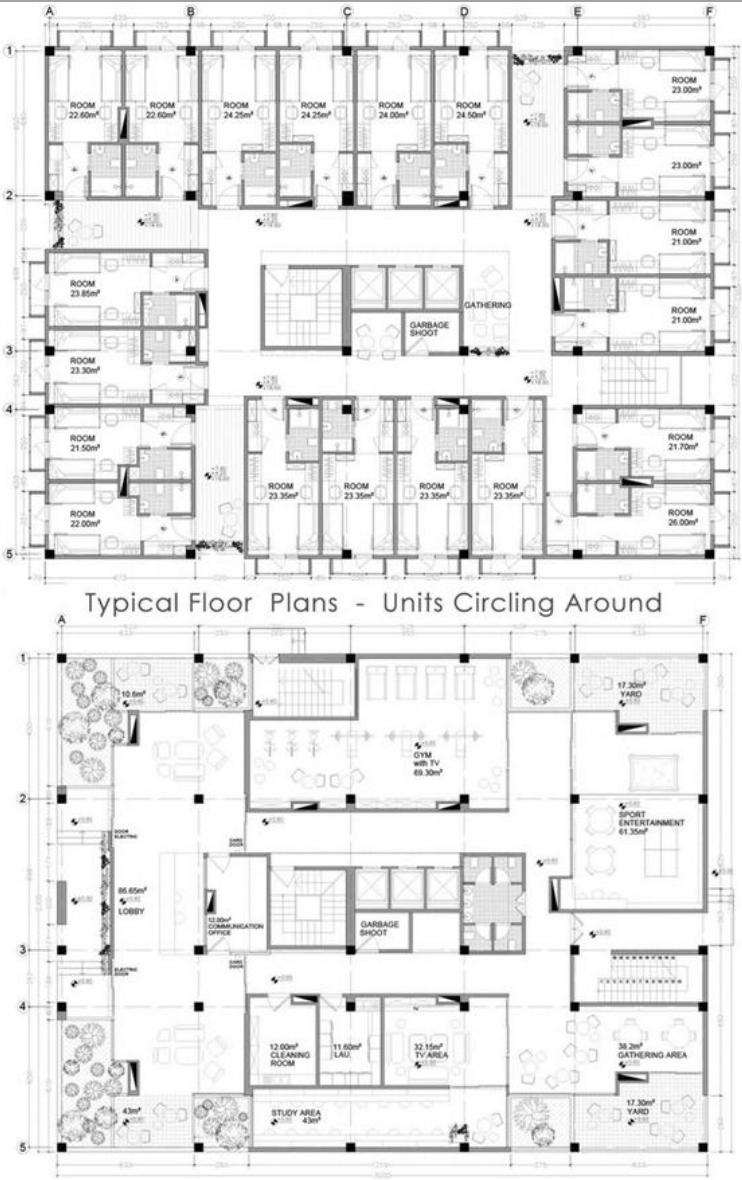

3. Penetrating the mass with greenery

4. Final form

SAWADI RESORT

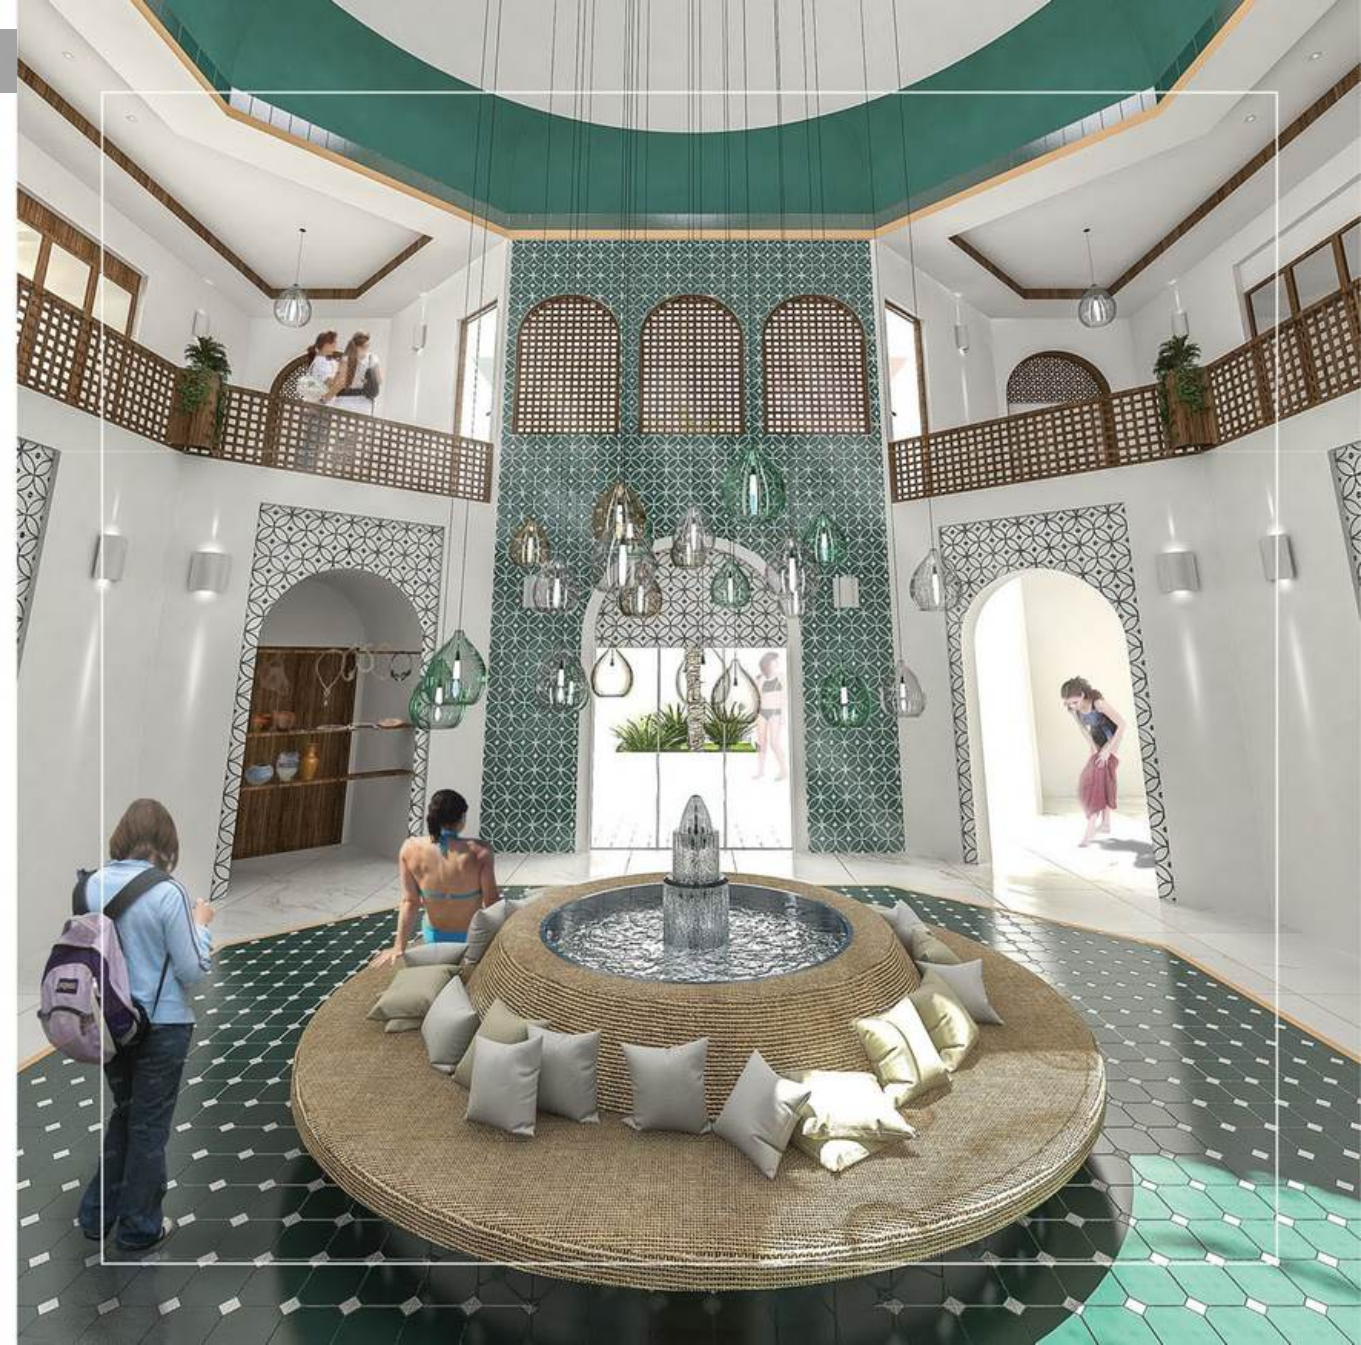

DEVELOPER: Blue City
CONSULTANT: Econtext
LOCATION: Muscat, Sultanate of Oman
FUNCTION: Resort
BUILT-UP AREA: 100000 m²
STATUS: Under Construction
DATE: 2018

Interior Design of Sawadi Resort which is located 60 kilometers away from the Muscat, Oman, was designed by Econtext Company. There is a contextual approach for interior design in the entrance lobby, sitting room and coffee shop with forms and decorations inspired by Arabic style.

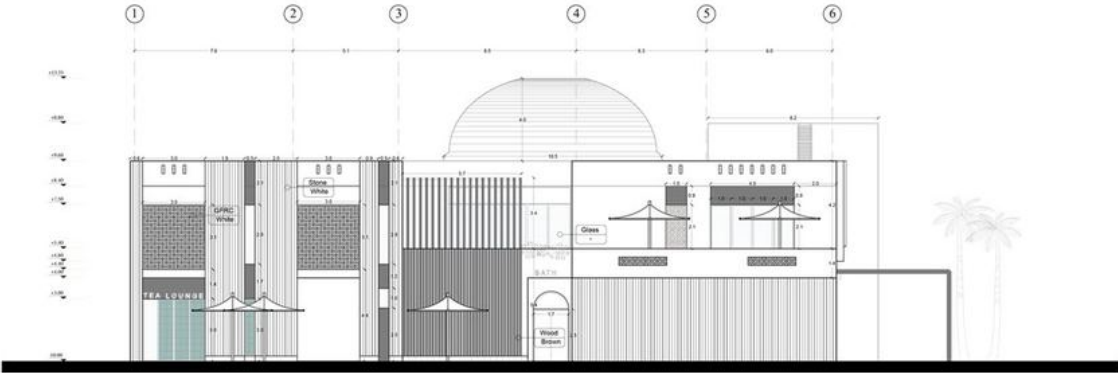

There is a three-story cubic restaurant in the middle part of the Sawadi resort. The interior design of this space has been emphasized on the central geometry of space. Transparent external skin provides magnificent views of the surrounding green landscape.

In both sides of Sawadi resort, small-sized villas are linearly sited. In their facade design, the latticed openings and shades are recognizable. VIP villas are located next to the Sawadi aqua park in three types. Architectural design approaches are: The diversity of the spatial organization, the mass-space integration of plans which creates minimal cubic composition with climate-base facades.

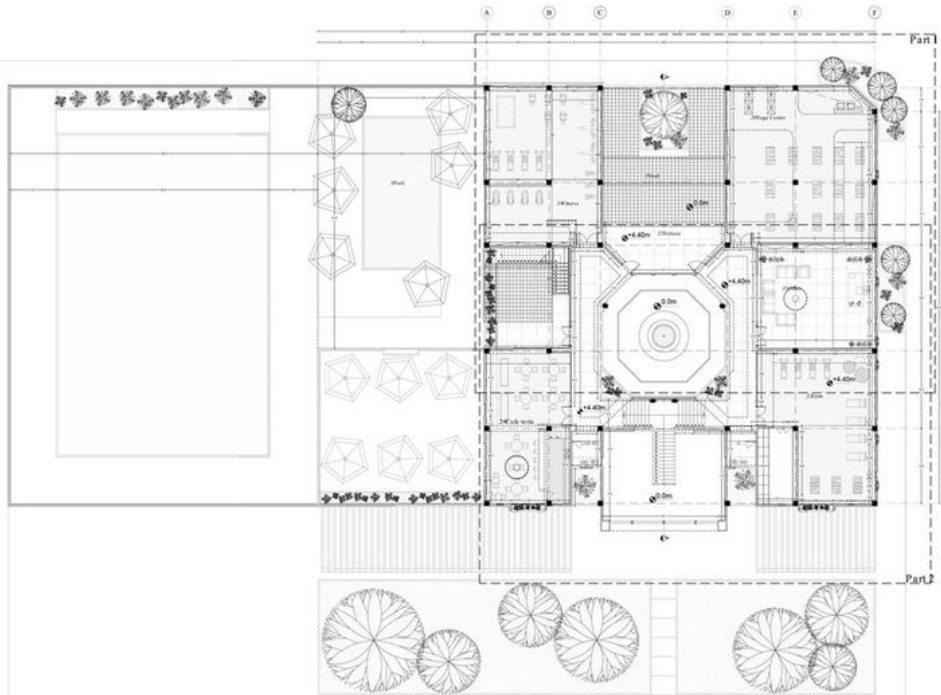

On the southwest corner of Sawadi resort, the women health club is designed with an Iranian-Omani taste. This two-story building includes Turkish baths, sunna and pools, a yoga and relaxation center and a water park. The club's spatial organization is inspired by the traditional Iranian baths. The central space dome and the use of Arabic ornament in the decorations leads to a design inspired by a combination of past and modern architecture.

IRANIAN HOTEL & CULTURAL CENTER

CLIENT: Embassy of Islamic Republic of Iran in Muscat.

DEVELOPER: Gulf Muscat United L.L.C.
Omran Maskan Iran Co.

LOCATION: Muscat, Oman.

FUNCTION: Educational & Cultural

SCALE: Architectural Complex Design

BUILT UP AREA: 19,798 m²

STATUS: Under Construction

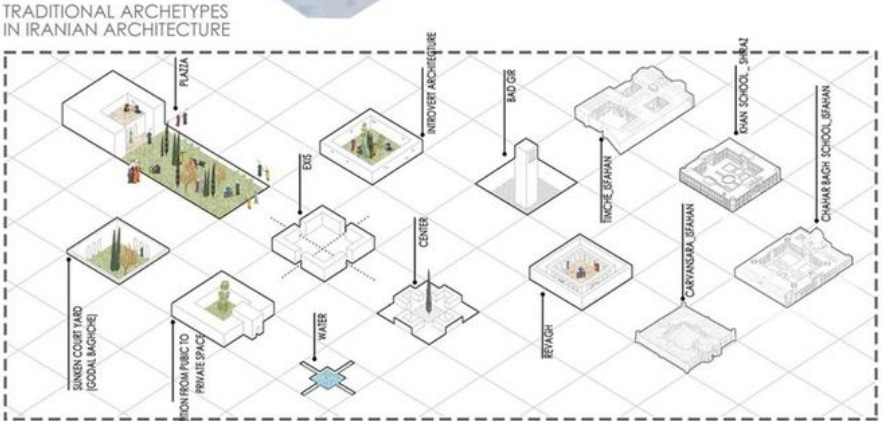

DATE: 2018

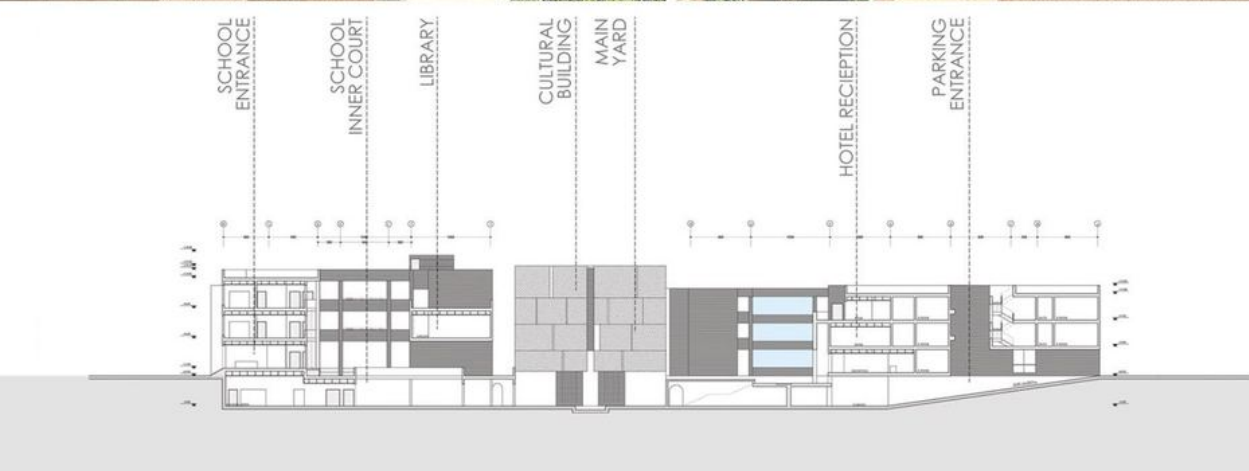

Due to increase in political, social and economic relations between the two countries of Iran and Oman, we're in a point in which presence of Iranians in Oman is now sensible more than any time before.

Therefore, providing an educational complex for Iranian immigrant students, educating in the Persian language and keeping Iranian culture alive in Muscat, Oman's capital has been considered. Iranian school cultural complex in Oman, in Muscat suburbs, is the Econtext company's work order, focusing on preserving Iranian identity while having a mutual interaction with Oman's architectural atmosphere, yet having a pioneer and contemporary look.

The project site is about 10000 square meters, including a school containing all educational levels from kindergarten to pre-university, and next to the school there is a joint courtyard which is based upon the cultural building. after this public space, a temporary residency (accommodation) containing 26 rooms and a residential complex of 26 apartments is considered which is by priority occupied by teachers and school staff.

GROUND FLOOR PLAN

ARINA BOUTIQUE HOTEL

CLIENT: Mr. Ilyavi

CONSULTANT: Econtext

LOCATION: Lavasanat, Iran

FUNCTION: Hotel

SCALE: Interior & Envelope Design

BUILT-UP AREA: 16,000 m²

STATUS: Under Construction

DATE: 2018

This 5-Star boutique hotel is located in Lavasanat Area, 10 km away from Tehran in a very unique natural zone which is surrounded by natural features like the river and mountains which will be a landmark for the Tehran visitors who want to have a special experience by the nature.

This project has 16 stories which in total is 72 meters high. Interior and façade design of this project has been done by Econtext Co. Following the project's integration with natural aspects of the area, the main concept of the interior design and also the façade design trays to match the nature.

In order to have the best view of the river, wide span traces were located on the edges. The material selection of this project is also inspired by nature; wood as the main material integrated with white JFRC natural patterns. The face of the building which opens to the road has vertical louvers integrated with lattice metal.

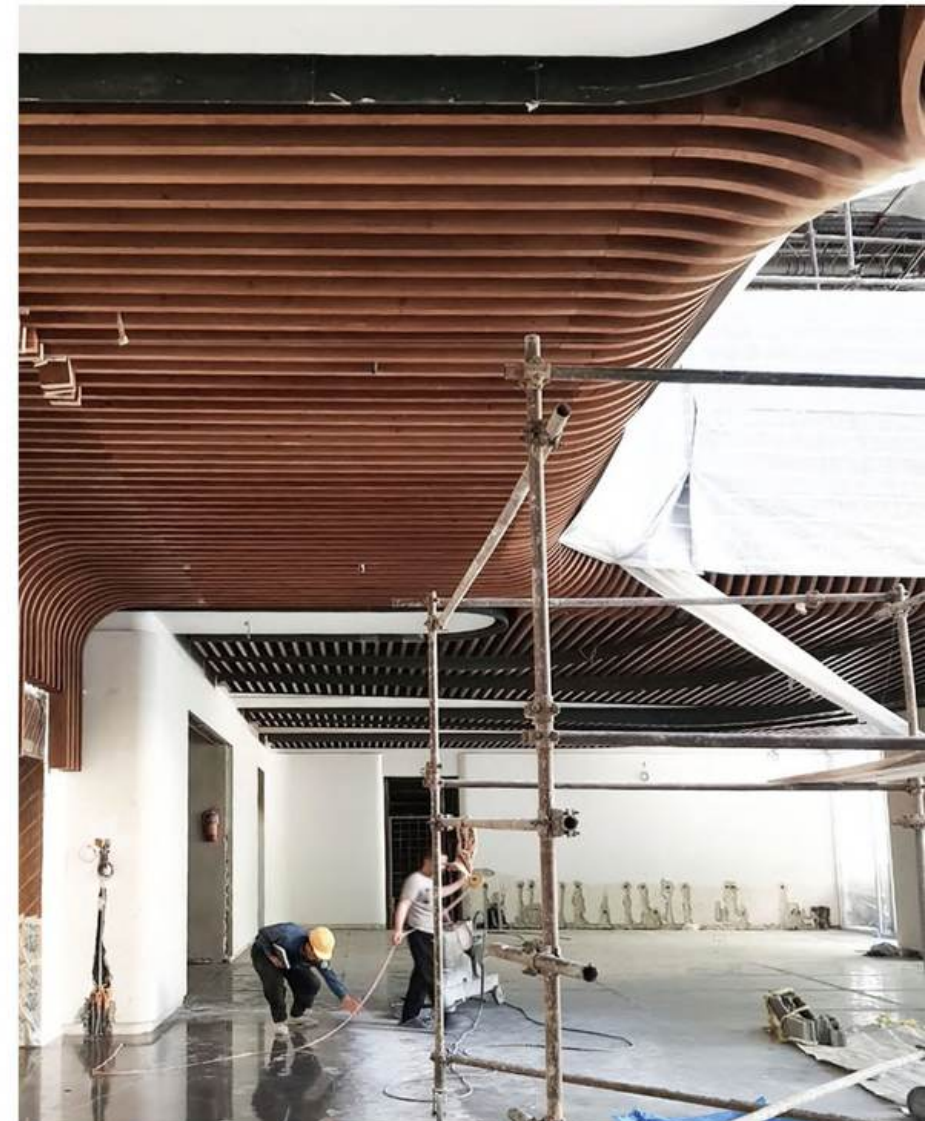

Regarding the rocky context, the landscape has provided a chance to design stone steps matching the topography of the riverside.
